TELECRANE NZ LTD

Telecrane wiring notes

Wiring diagrams for all models are located on the receiver front panel, and are also available from the installation manual. Below are a few additional notes that may be of some help

F25 Models

- Power input feed to wire #1 & #2
- Connect wire #3 to #1
- Coms #5, 10, 14, 18, 20 & 24 joined together. Jumper wire from #3 to Coms.
- Wire #4 would normally liven the emergency stop contactor (if fitted)

F21 Models

- Power feed to Black and Brown
- Loop from Black to Orange
- Red to emergency stop contactor (if fitted)

Please note to start F21-4D transmitter, the rotary green Off/On switch needs to be rotated further to start position.
